

 **FCI**
Watermakers
THE WORLD'S FINEST

Now available with optional water lubricated, duplex stainless steel, radial axial pump. Five plungers allow for smooth, quiet pulsation and vibration-free operation. 8000 hour warranty.

The Max-Q Series is among the most advanced watermakers ever manufactured. You can customize your watermaking needs by utilizing FCI's exclusive UROC technology from a remote location or a personal computer. Both framed and modular configurations produce fresh, clean water with outputs of 600, 1200 or 1800 GPD. Because each component is tested and chosen for its ability to withstand long-term operation, every Max-Q is engineered and designed to operate in the harshest of marine environments. We have also eliminated the need for pressure gauges and flow meters to provide years of dependable service and worry-free operation. Max-Q—The future of watermaking.

MODULAR UNIT

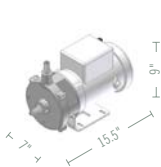

Model MQM1826S Shown

FRAMED	MODULAR	GPD/LPD	GPH/LPH	HP	KW	MEMBRANES
MQ626S	MQM626S	600/2270	25/95	2.5	2.24	1 (2.5" x 40")
MQ1226S	MQM1226S	1200/4541	50/189	2.5	2.24	2 (2.5" x 40")
MQ1826S	MQM1826S	1800/6811	75/284	2.5	2.24	3 (2.5" x 40")

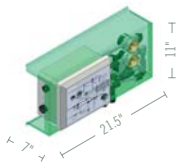

NOTE: Specifications based on 25°C, 32,500 TDS Feed, and, 820psi at 60 hertz

FEATURES:

- State-of-the-art engineering and electronics, UROC—Universal R/O Controller with computer interface and multiple remote station capability
- RS-485 connection for display and monitoring up to 4000 ft. away
- 316SS low-pressure pump with closed impeller design
- Programmable Fresh Water Flush with recurring automatic flush feature
- Digitally monitors water pressure and flow
- Quiet, efficient operation
- Conservatively rated to insure performance under varying conditions
- Commercial sized pre-filtration
- 316SS high-pressure pump and fittings
- Pressure vessels with 316SS product and pressure ports, stress-eliminating engineering with LIFETIME WARRANTY
- Washdown duty motors (epoxy coated, neoprene gaskets)
- User-friendly with ergonomic design for ease of use
- 4-point vibration isolation mounts for quiet operation
- 2-year product warranty

OPTIONAL EQUIPMENT / ACCESSORIES:

- Radial Axial Pump
- Digital Remote / Monitoring Station
- Filter Replacement Kit
- Ultra-Violet Sterilizer
- Media / Iron Removal Filters
- Granular-Activated Charcoal Filters

ACCESSORIES

FCI Watermakers carries a complete line of replacement parts, accessories and optional equipment that maintain the quality, reliability and efficiency that you have come to know and trust in FCI. So, the next time you perform routine maintenance, or would like to upgrade your Reverse Osmosis system, look to FCI Watermakers. The World's Finest.

Additional Displays enable you to program and access the system from a remote location.

FCI carries a complete line of replacement parts which include filters, membranes, hoses, fittings, spanners, o-rings and more.

Multi-media and Iron Removal Filters remove particulate or iron from the feed water stream. Filter includes valve tree assembly and stainless steel differential gauges.

Granular-Activated Charcoal Filters are great for post-tank filtration, and remove particulate, chlorine and other contaminants found in your fresh water holding tank.

Stainless Steel, Ultra-Violet Sterilizers provide 99.8% sterilization of bacteria and micro-organisms in water. Available in a variety of flow rates.
